

Senior Scientist Cellular Assays

ImmunXperts offers a wide range of Immunology services with a strong focus on immunogenicity and immuno-oncology. The offerings include in vitro assays to assess the immunogenic potential of test molecules using T cell activation and proliferation assays as a surrogate marker for the induction of Anti-Drug-Antibodies. On the immuno-oncology side, ImmunXperts develops in vitro assays to assess the functionality of candidates. ImmunXperts is your partner of choice for the development and customization of cellular and molecular assays and for assistance with protocol optimization and in-house training.

Job Description

As Senior Scientist, you will work with our cellular assay team to optimize and validate a wide variety of existing and new assays. You will ensure that running and established assays are performed in a controlled and reproducible way. Based on customer demand, your background in immunology allows you to deploy novel routes of predictive and functional testing. You will work in close relationship with a growing team of scientists and lab technicians.

Key responsibilities

- You will perform cellular assays according to the Standard Operation Procedures
- You will be involved with the development and optimization of cellular assays
- You will analyze data and write technical and scientific reports
- You will plan and organize your daily work in consultation with your supervisor and colleagues and ensure on time delivery
- You will supervise laboratory technicians
- You will be responsible for selected customer projects and the related project management and direct communication with the customer and our partners and subcontractors
- You will assist the drafting of proposals
- You will assist with the implementation of quality standards
- You will attend conferences and give technical and scientific presentations

Experience

- Master or Ph.D. in Immunology, Biology, Pharmaceutical Science, or equivalent by experience
- Hands-on experience with cellular assays and immunological methods, including flow cytometry, Luminex and Elispot
- Experience in working with primary cells
- Experience with assay development and optimization
- Experience in working with customers and service providers

Profile

- At least 3 years' experience in the pharmaceutical industry, biotech or CROs
- Team player and ability to adapt in a highly flexible environment
- Excellent communication and organizational skills
- Studious and attention for details
- Customer focused and oriented
- Self-motivated with ability to adapt
- Good English and French (written and spoken) skills
