

Valesta is the privileged partner of pharmaceutical companies, CROs (Contract Research Organisations) and all other companies that organize, coordinate and carry out clinical research projects.

To support our ongoing growth and the urgent demand of one of our clients we are searching for an enthusiastic

### **JUNIOR CLINICAL RESEARCH PHARMACIST**

Maybe you will be our next colleague?

#### **> Job Description**

As a Junior Clinical Research Pharmacist, you will join the Pharmacy Operations and Regulatory Department of the company.

#### **> Responsibilities**

- You take in charge the setting up of clinical studies and reception, storage, preparation and drug accountability of investigational medicinal products for Clinical Research Unit volunteers.
- You meet regulatory requirements for preparation of dose formulations under Good Clinical Practices for new chemical entities and in accordance with current pharmacy compounding best practices where applicable.
- You participate to pharmaceutical activities of the Clinical Research Unit.
- You review and provide input for study related documents such as the study protocol, informed consent document, extemporaneous dispensing record (EDR), dosing administration instruction (DAI) and clinical supplies agreement (CSA).
- You compile CTA submission packages and respond to queries from regulatory authorities in a timely manner.
- You provide, when requested, reference research pharmacy services with respect to correct protocol execution.
- You organize and manage all clinical activities from screening to unit admission, ambulatory and follow up phases of a specific study.

#### **> Profile**

- You are a Pharmacist.
- You are a young graduate or you have decided to operate a conversion to clinical studies (good opportunity to discover Phase 1 clinical Study).
- You are fluent in French and in English.
- You have a quality mindset, you are stress resistant and problem solver.
- You are a real team player and you have strong communication skills.
- You have strong organizational skills.
- You are proactive, innovative, motivated.
- You are meticulous, you pay attention to details and you are compliant.

engage. share. enjoy.

- You are flexible : available to work during some week-end (even if it is not quite frequent)

### > Company Description

Valesta is a dedicated **HR partner** for pharmaceutical firms as well as CROs (Contract Research Organizations) and all other companies that organize, coordinate and carry out **clinical trials**.

Valesta operates as a **matchmaker** between companies seeking for the right staffing solution for ongoing clinical research projects and professionals working in clinical trials looking for a first or next step in their career.

Next to our **expertise** (thanks to our years of **experience** in the field of clinical studies), we offer a **continuous flow** of new client requests and career opportunities, ranging from administration to management, from research to commercial, all situated in the exciting world of clinical trials.

### > Offer

We recruit candidates for **contracts of unlimited duration**, with great opportunities for personal growth, all tuned in to your personal needs.

#### Valesta offers

- A challenging job in an exciting environment
- An attractive salary with additional benefits completely in line with your function and experience.
