Iteos Therapeutics is a Belgian innovative biotech company based in the South of Brussels (Gosselies). This human-sized structure is a leader in small molecule immunomodulators for cancer immunotherapy.

Iteos Therapeutics shows the ambition and the resources to grow to a worldwide class. Its main objective for coming years is performing preclinical and clinical validation of innovative therapies for cancer treatment. Please visit www.iteostherapeutics.com.

In order to support this challenging growth, we are actively looking for a (m/f):

**Group Leader**  
- Screening, In Vitro Pharmacology -

**Responsibilities :**

As a Group Leader, you are in charge of developing and optimizing new screening assays for target and drug discovery programs. You are responsible for the adaptation of specific assays in 96 well format and for the development and validation of a medium throughput screening platform. You are in charge of the characterization of small molecules for the development of innovative cancer immunotherapies. Your main responsibilities are as follows:

- **Manage the assays development and optimization, and the In Vitro Pharmacology team (2 to 5 scientists) and partners.**
- **Develop and validate assays with recombinant proteins or transfected and primary cell lines using Standard Operating Procedures.**
- **Collaborate with other project stakeholders, and discuss assays results with them.**
- **Compile data, analyse, summarise and present experimental results.**
- **Represent the company in congresses and external meetings.**
- **Report work evolution on a regular basis.**
- **Perform bibliographic research.**

**Profile :**

- **PhD or MD in pharmacology (in vitro), enzymology, biochemistry or closely related field.**
- **Around 5 years experience in the biotech/pharma industry or in a similar academic position.**
- **Experience and expertise in enzymatic and cellular assays development and validation.**
- **Very good knowledge of running a screening platform (20-25K in 96/384 format).**
- **Strong scientific publications track record.**
- **Good understanding of tumour immunology.**
- **Rigorous, detail-oriented, autonomous, committed and flexible.**
- **Assertive, real driver, people manager and people developer.**
- **Excellent oral and written communication skills in English.**
- **Strong team spirit and excellent interpersonal skills.**

**Offer :**

- **A manager position within a high-potential innovative biotech company.**
- **To work in a human-sized, dynamic, respectful and professional environment.**
- **The opportunity to take part of a challenging scientific and business growth.**
- **Varied contact inside the company, the biotech/pharma sector and the scientific world.**
- **An attractive salary package in line with the position responsibilities and your experience.**
