

<b>Company</b>	Advanced Medical Diagnostics SA/NV
<b>Job offer</b>	<p><b>Clinical Research Associate</b></p> <p>Advanced Medical Diagnostics is a start-up company that develops and markets an innovative medical device in the area of cancer diagnosis. We are looking for a CRA to set up, monitor and complete clinical trials and to serve as the lead guide to train doctors in using our device in the optimal way, as well as to receive clinical feedback from our customers concerning their use of the device. For more information on us: <a href="http://www.HistoScanning.com">www.HistoScanning.com</a></p>
<b>Introduction</b>	<p>You will be involved in setting up the study centers - ensuring each center has the trial equipment and training the investigator and staff; monitoring the trial throughout its duration which will involve visiting the study centers on a regular basis to check the patient data in the case report forms (CRFs) and to sort out any problems which may arise; validating and collecting completed CRFs from hospitals; closing down study centers on completion of the trial; guiding doctors in usage of our device and mentoring them in interpreting its results. As the device is very innovative and new there is a need to assist doctors in smooth adaptation.</p> <p>For this the doctors need support from a person who is able to understand their needs, have a deep knowledge of our device and the clinical evidence associated with it, and is able to guide them toward optimal usage.</p> <p>You will be traveling intensively, mainly in Europe, meeting with our clinical studies centers.</p> <p>The position is therefore involved with 80% of the time spent in travels.</p>
<b>Description</b>	<p><b>Education:</b> Masters or PhD degree in life sciences.</p> <p><b>Experience:</b> Suitable experience can be in one of the following domains: application specialist, trainer, clinical research associate, research nurse. Familiarity with MS windows operating system, and capacity to perform basic PC hardware troubleshoot is an advantage.</p> <p><b>Personality:</b> We look for a person who is able to grasp complex scientific and technological ideas and explain them in simple words. A great communicator who is assertive and creative while still maintaining his scientific credibility. The person should be independent and flexible but also keep a team spirit. Good organizational and administrative skills are also important.</p> <p>Other skills: Excellent of English is a must. Knowledge of other European languages is an advantage. A driving license is needed.</p>
